

EJEMPLO 2: SAT

Emilio Letón
Dpto. Inteligencia Artificial, UNED

Ejemplo 2: SAT

$$x \wedge (\bar{x} \vee y) \wedge \bar{y}$$

SAT (1/2)

$$0 \wedge (\bar{0} \vee 0) \wedge \bar{0} = 0 \wedge (\quad) \wedge 1 =$$

$$0 \wedge (\bar{0} \vee 1) \wedge \bar{1} = 0 \wedge (\quad) \wedge 0 =$$

SAT (2/2)

$$1 \wedge (\bar{1} \vee 0) \wedge \bar{0} = 1 \wedge (\quad) \wedge 1 =$$

$$1 \wedge (\bar{1} \vee 1) \wedge \bar{1} = 1 \wedge (\quad) \wedge 0 =$$
